

North Lawrence Town Hall and Garage

Client: Town of Lawrence
North Lawrence, New York

Beardsley Design Associates provided design services to the Town of North Lawrence for a USDA funded, \$500,000 new Town Hall and Highway Department garage. The Town Hall is nearly 2,400 SF and houses six comfortable offices for the town officials. The building also has office locations for the town historian, clerk, and judge. A courtroom occupies approximately 25% of the building. A unique in-floor hydronic system provides a comfortable environment for the building's inhabitants. The attached 8,000 SF garage building has five large bays capable of handling the town's maintenance vehicles.
